

Vertical Contact Toaster | VCT

VCT-35

For more than 25 years, the Vertical Contact Toaster has been a staple in foodservice operations, building a reputation for quality, performance, and reliability throughout the world.

The Vertical Contact Toaster gives buns a consistent, golden brown finish so they don't soak up the juices of the ingredients, helping the sandwich stay firm and delicious. With a dual-sided platen, the Vertical Contact Toaster has more capacity than conventional single-sided toasters, allowing operations to quickly serve fresh products to customers without making them wait.

The VCT-35 features a dual-sided platen that provides twice the toasting capacity of conventional single-sided toasters. Place buns in the top of the toaster, and then in 15 seconds, golden brown, warm buns can be retrieved from the bottom.

FEATURES

- Dual-sided platen for additional toasting capacity compared to conventional single-sided toasters.
- Easy-to-adjust dial thermostat.
- Space-saving vertical design.
- Continuously moving conveyor allows for immediate toasting.
- Separate compression adjustments for heel and crown.
- Release sheets allow buns to move easily down the heated platen without sticking or slipping.
- Easy to operate and clean.
- Stainless steel construction.
