Specifications

The Fabristeel Dual Warming Drawer (DWD Series) is designed to hold and maintain correct food serving temperature.

The fully insulated body contain the heat effectively leaving the external surface safe tor contact.

Drawers, fitted with soft-close heavy-duty drawer slides, with handle and stainless steel construction, can be pulled out fully, allowing bigger food items to be stored inside. Food can be placed directly into the drawer(s) or into another pans and containers.

Temperature and Moisture Content of food can be controlled independently using the built-in Temperature Controller and the Crispy/Moist Slide Vent respectively. Individual displays showing the current temperature are also fitted for your convenience.

The Free-Standing model rest on tubular legs with adjustable foot inserts.
Also available in Slide-In model (F70-804)
