Specifications

The Fabristeel Transfer Bin is a table top design unit that aids in transferring pre-packed burgers and fries while preserving its freshness. Its multi-tier, pass thru, open concept design, allows user to organise and quickly place and retrieve the pre-packed items with ease. There is also a tier that is specially designed for pre-packed fries.

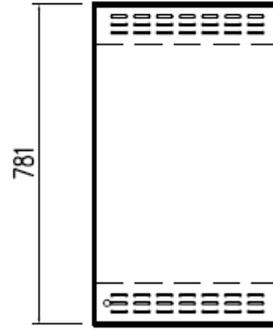

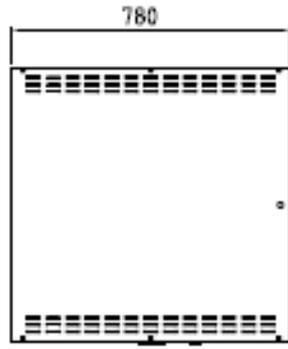

With heaters equipped in each tier and a large LCD temperature display, temperatures can be monitored and maintained uniformly according to the users' needs.

With the Fabristeel Transfer Bin, food safety is never compromised.
